## EXPERIENCE

### Zafin center of excellence

Feb 2016- April 2018

Senior Test Engineer

Zafin is a banking software enterprise platform company that provides relationship-based pricing to banks and financial institutions. Here I have Worked as Senior Test engineer of Banking product testing (Alpha testing) for various banks such as Barclays, Skandinaviska Enskilda Banken, Emirates NBD and Standard Chartered. Zafin has their financial products to serve banks in Strategic billing solutions and Loyalty services.

Worked as Senior test engineer and managed the internal testing processes and reporting

### Primary responsibilities include

- Requirement Analysis.
- Giving valuable Test plan inputs.
- Preparing Test Summary Reports.
- Preparing Test conditions and Test cases, and maintaining traceability matrix.
- Review of Test Scripts.
- Product installation in local and cloud websphere environments
- Bugs reporting and tracking using Quality Center
- Scheduling and attending calls with development team.
- Communicating technical problems and process in the application.
- Prepare reports on the daily status& operation of software.
- Managing junior testers during the execution of projects
- Updates the pipeline and capacity planning sheets and provides timely information

- 
- Automating the batch processes using pre-developed pearl framework
