PROJECTS

Title : Biometrics Based Licensing System for an Automobile

Platform : Embedded System Design

Duration : 6 Months

Description : This project is a fine combination of Biometric technology and Embedded system technology. To prevent non-licenses from driving and causing substantial damage. Fingerprint based licensing system can be used to verify. Fingerprint sensor and Smart card are the main part of the system. This system provides both i.e. Persons Identification and Authentication. Biometrics is a technology that identifies a person based on Physiological or Behavioural characteristics. This system can improve road safety.

Title : Online Voting System

Platform : MS.NET, Java

Duration : 1 Month

Description : The Project Online Voting System mainly emphasizes on casting their poll online anywhere from the globe. The voter can register themselves and they will receive a system generated voter id. The voter can login using their respective voter id and password saved in the system. The voters on or above 18 years of age can cast their vote without going to their respective ward. The voter once voted cannot cast their vote again.

TRAININGS

- ✓ DOT.NET Technologies
- ✓ Database Technologies
- ✓ OOPs with C++ programming
- ✓ Java Programming
- ✓ Advanced Web Programming
