Engineering Project:

Name:Emergency Location Tracking Using GSM and GPS Modem

Description:The world is becoming unsafe for women. In Indian cities, most common incidents being rape, kidnapping, sexual harassment, etc. So we are going to design a circuit using which woman in distress can call for help by just pressing a button on her smart gadget like smart watch, etc. It has the ability to help women with technologies that are embedded into a compact device.

The women wearing this device as a watch or band, in case of any harassment or when she finds that someone is going to harass, she presses a switch that is located on the watch or band, location of the information is sent as SMS alert to a few predefined emergency numbers. The system allows knowing exact location of the individual, as soon as the trigger key is pressed.
