## PROJECT DETAILS

### Automatic Solar energy irrigation system:

The main aim of the is to decrease the work load on the farmers ,whose field are far away from the residential areas, and the areas where supply of electricity is very less .

WORKING:-As the land or farm becomes dry, the power supply will be switched on automatically and the motor will operate and water will be supplied to the field.

After that the moisture of the soil will be sensed and according to that the supply of water is discontinued automatically.
