## Projects-Software Testing

### Whiteboard

*Jan 15 to Apr 16*

Description: It is mainly web based meeting playground. Many participants can communicate and share knowledge using this website. It's like online tutor institute. My role in this project is to generate JavaScript to automate the test case. I was closely working in a team where all co operatively aligned to build a script which would carry a regression of 500 - 600 test cases. I was working on protractor framework.

### Huddle - wrapper

*Oct 17*

Description: It combines whiteboard and huddle project details including customs settings. My role in this project is to generate JavaScript to automate the test case. I was closely working in a team where all co operatively aligned to build a script which would carry a regression of lots of test cases. I have experience of working on protractor framework.

### Sol

*Jan 15*

Description: SOL application is logistic application. My role was to test application manually. And also prepared traceability report, defect report and test case in excel. Also tested application in pda (public device access) device. That is used to track vehicle transport information.

### Scout Decor

*July 14*

Description: Tested a Scout Decor application manually. This application is used to decorate home. User can purchase and also add requirement list whatever they want to decore home.
