Academic Project

Project Title : **Dual Axis Solar Tracker**

Team Size : Four Members

Basic Principle : As the non-renewable energy resources are decreasing, use of renewable resources for Producing electricity is increasing. Solar panels are becoming more popular day by day. Solar panel absorbs the energy from the Sun and is stored in the battery. This energy Can be utilized when required. Solar panels should absorb energy to a maximum extent. This can be done only if the panels are continuously placed towards Sun direction. So Solar panel should continuously rotate in the direction of Sun.
