OBJECTIVE

Seeking position in Manual Testing and willing to be involved in work where I can utilize my skills and creatively involved with system that effectively contributes to growth of organization.

WORK EXPERIENCE

Application Support Engineer, Intellect Design Arena LTD. – March 2016 till date

As working on RBI project

(E-Kuber CBS and E-Kuber portal), worked on many schemes such as

- Sovereign Gold Bonds(SGB).
- RBI internal Development and Implementation.
- Co-ordinating with Banks for flawless operations in new and existing schemes.
- Inward Clearing
- Fixed Assets
- Financial Entry Request

Job Description

- Troubleshooting with SQL and XML for solving issues related to Applications.
- Building SQL Queries for data extraction.
- Co-ordinating with development team for implementation of new product related development.
- Conducting testing of System and maintaining records of all clinical tests performed on client application.
- Manual Testing for application as per scenario given and reporting errors.

PROJECTS

Ekuber (Core Banking System)

- E-kuber is a web application which RBI uses for its Internal Banking and management process.

Role :-

- Building SQL queries for fetching different kind of data as requested by client and development team.
- Performing manual testing on fixes sent by development team before deploying the fixes in live product.

- Running store procedure provided by development team on UAT system for bug fixes and new deployment.
- Deploy the fixes in live product by executing the SP in live database.
- Handling users queries related to Product and Coordinating with Helpdesk team to provide them with technical solutions.
- System configuration.

Ekuber Portal

- A banking portal provided by RBI to Other Banks for performing banking operations online.

Role:-

- Building SQL queries for fetching different kind of data as requested by client and development team.
- Running store procedure provided by development team on UAT system for bug fixes and new development.
- Manual testing the fixes deployed with given test scenario and documenting the test cases.
- Deploy the fixes in live product by executing the SP in live database.
- Deploying packages and store procedure for new service and schemes in portal.
- Troubleshooting XML files for various file upload services in portal.
- Handling banks technical queries regarding the Product, for various schemes from RBI and regular banking operations.
