Working as a Test Engineer in ClingITSolutions, Pune from May 2016 to Till date.

Projects Experience

1) ZING BIKES

This project is a Hybrid App for Rift Motion named ZINGBIKES. It's a hybrid app through which one can book the bike from ZINGBIKES warehouse if available. We maintain the booking, booking history, warehouse, bikes availability, Payment Gateway.

Responsibilities:

- Understanding the Requirements and Functional Specifications of the application.
- Participated in identifying the required Test scenarios.
- Prepared and Executed Test Cases as per System Requirements for Supplier module.
- Performed various black box testing Methodologies Like Functionality testing, Compatibility Testing, Database Testing, Usability Testing, Regression testing and Server Log Files Testing.
- Defect Reporting and Tracking using Bugzilla.

2) ASSIGNMENT SUBMISSION PORTAL (ASP)

This project (Maintenance, Testing, Development and Testing, Migrating) – ASP (Assignment Submission Portal) is an educational product that will help students, teacher and colleges as well. As the name suggests this product is basically works to accept the assignment and store into it. Teachers will assign the task with the deadline and students have to submit the assignment within deadline. All submissions are stored into database hence, Colleges gets two advantages they don't have store paper work of the students and data searching of any particular person becomes easier.

Responsibilities:

- Understanding the Requirements and Functional Specifications of the application.
- Participated in identifying the required Test scenarios.
- Prepared and Executed Test Cases as per System Requirements for Supplier module.
- Performed various black box testing Methodologies Like Functionality testing, Compatibility Testing, Database Testing, Usability Testing, Regression testing and Server Log Files Testing.
- Defect Reporting and Tracking using Bugzilla.
