Academic Projects

Title : Deaf Mute Communication Interpreter

Platform : Hardware Platforms (ARM, AVR, DSP etc)

Duration : 12 Months

Description : Core idea behind this project to use computing technology to facilitate communication between two persons who cannot converse directly. In this project we intend to assist the person using sign language in communicating with those who cannot understand sign language. Deaf Mute Communication Interpreter is a device that translates the hand gestures to normal speech. To convert letters into audio file use Wave player. In this project we use software like Proteus, Eagle and Flash magic.
