### **Company Information :**

Balaji Software is a global IT services and products company. We design, develop and manage IT and application systems for organizations around the world. Our distinctive position in the marketplace is not based on our size, reach or assets but on our unique expertise and insight into contemporary trends on how technology, in particular web technology, can be used to help our customers address their strategic and operational issues. Balaji Software forte is in designing core application architectures and software platforms, running on cutting-edge open systems.

### **Project Information :**

#### **Project #1 :**

**Project:** Honeywell (IOT Project)

**Platforms Used :** iOS and Android Devices and Desktop.

#### **Technologies Used :**

- Development Method: Agile
- Test Case Execution tool: Contour
- Bug Tracking tool: **JIRA**

**Project Description:** Honeywell has a lot of ongoing Projects among which, I am working on Thermostats (**Camera Device, EMEA Thermostat, NA Thermostat, HBB and Spruce Thermostat**). The Thermostat is basically connected with the Mobile app and the testing goes on based on the situations and features it has. Thermostats are used in US, UK for controlling the Heating and Cooling temperature.

- It contains Geo-fence as its main feature where testing needs to be done in and out of a particular set radius, where the user can activate this feature automatically without doing it manually.
- The app has the feature to operate the Thermostat from anywhere.

**Role and Responsibilities:** QA Engineer

Roles performed:

- Executing Test Cases on Mobile devices, Android Tablets and iOS devices.
- Created Test Cases based on the Scenarios.
- Logged defects using Defect tracking tool like JIRA.
- Documenting, tracking, & communicating test result.
- Testing End scenarios.
- Testing the Mobile app and the Thermostat device connected to it.
- Communicating with the client on daily basis.

## **Project #2 :**

**Project:** Social Retail Application (SRA)
