PROJECTS DETAILS:-

Project title : TRANSLATION SOFTWARE FOR DEAF PEOPLE.

Description : Translation software for deaf person is software which will be helpful for normal person who wants to communicate with the deaf person.
In which the voice will be converted into text and later into sign language with the help of translation.

Project title : INSTANT EVENT

Description : This is an online event management system. The main idea of the project is used to maintain the event information and organize the event among colleges.
The Admin panel is created separately because admin is one that enters the details of event, pictures, location etc. which can done via keyboard instead from android application.
The User panel is Android application. The android app will be integrated with website. As we are providing location we are using web services that provide exact location via GPS in JSON format and QR code scanning system is also used to find particular place in college.
