## **ACADEMIC PROJECT SUMMARY**

### **BE Project : DATA LEAKAGE DETECTION AND PREVENTION**

#### **Brief Description**

*In this project we devised a technique to check out whether the data is leaked or not. The agent will then send the such secured information to broadcast the data via a server to other agents. We will check whether the authorized user leaked the data to another agent.*

#### **Features**

- ✓ To detect the data that has/have been leaked.
- ✓ To identify the agent that leaked the data.
- ✓ To maintain a history for record purpose.

**Technologies Used**      *Front End : Java*                      *Back End : MS-Access Program.*

### **Diploma Project : EMAIL SERVER**

#### **Brief Description**

Email server is a program which manages access to a central computer within our network which works as virtual post office and facilitates user.

#### **Features**

- ✓ Mail sending/receiving with encryption/decryption.
- ✓ Spam filtering,, status tracking module.
- ✓ Contact management & chat module.

**Technologies Used**      *Front End : Java*                      *Back End : SQL Server*
