### **Project Details :**

---

**Project Title:** Home Appliances Online Purchasing System.

**Description:** The aim was to develop an e-commerce website that helps customer to buy home appliances online .This is a web based application which helps users to find and buy latest home appliances online.

### **Testing Project :**

---

**Project Title: REDHAT**

**Description:** It is a web-based easy-to-use application designed for time tracking and management. It helps strengthen your team by improving business process, analyzing team performance and reducing business cost. This project is used to manage client details, projects, tasks, time details and billable, users and reports. It allows time tracking for different customers, their projects and the task done in the particular projects. Since we are managing entire project details in this software, so we called it as a **Project Management System**

As part of my training program in “Q-Spiders”, i did following testing on **REDHAT**.

### **Assignment :**

- Performed functional, integration and system testing on REDHAT.

### **Assignment:**

---

- Functional testing on Gmail Home page.
- 100 integration testing scenarios on Gmail Home Page.
- End to End Scenarios on Flipkart online shopping.
- Converted functional testing scenarios of Gmail Home Page into test cases.
- Smoke and Unsmoke testing features on Facebook.
