

#### SUMMARY STATEMENT

Designer and developer pairing a strong typographic sensibility and deep understanding of brand and identity systems with a steadfast commitment to user-centered design. Experienced in all aspects of the digital production/software development cycle.

#### RECENT EXPERIENCE

##### CareerFoundry

Web Developer, Oct 2014 - Apr 2017

- ➔ Ensured brand consistency in the product by developing typographical and color guidelines based on the existing site; these guidelines are still in use across the company
- ➔ Introduced onboarding for new students by leading the creation of an onboarding site, from user research through prototyping, user testing, creation of pixel-perfect designs, copywriting, and development
- ➔ Led the redesign of the student dashboard, which is a core part of the product; created wireframes and information architecture, participated in user testing, created pixel-perfect designs, and developed the front end
- ➔ Increased note-taking among students by 120% by designing and developing a note-taking feature to replace a lower-quality existing one
- ➔ Improved the quality of CareerFoundry's web development course by rewriting the majority of the front-end development section
- ➔ Provided and received regular code review as part of a Git workflow and contributed to planning Agile sprints
- ➔ Contributed as a full-stack developer on a Ruby on Rails application
- ➔ Expanded RSpec test coverage for the application
- ➔ Refactored JavaScript to be object-oriented and follow the module pattern
