## PROJECTS UNDERTAKEN

### 1. Robust Text Independent Speaker Recognition System:

This project will automatically find out who is talking based on the Speaker voice signal. The voice is recorded using microphone and then the features are extracted using MFCC. Speaker modelling is done using GMM and MLP to increase accuracy in presence of noise.

### 2. Scrolling Word on 8\*8 Dot Matrix Display using 8051:

The aim of this project is to design a textual display system, based on a light emitting diode (LED) on 8\*8 dot matrix array powered by electric supply.

### 3. Automatic Street Light:

This project is all about to control the power consumptions at the streets and eliminating manpower. This includes specific sensor such as LDR which controls the circuit of street light during day and night.
