ACADEMIC PROJECTS UNDERTAKEN:

- SPARKS- SMART PARKING SYSTEM (2016-17)
 - Team size: 4
 - Language: Java
 - Project description: The project is based on the concept of Internet of Things. The Ultrasonic sensors along with the Arduino UNO and Ethernet shield will detect the presence of a car in particular parking slot and will display the empty parking slots on the java front end and respective changes will be reflected into the database. The Android application will guide the user by showing the map of the allocated parking slot.
- ONLINE EXAMINATION SYSTEM (2016)
 - Team Size: 4
 - Language: .Net
 - Project Description: The project is based on automation of examination system. The user can login using a valid username and password that is created by the admin account. The user can then choose the subject and attempt the examination consisting of multiple choice questions. Results are displayed immediately after the examination.
