Manual Projects:-

1.Online banking system:- Banking Applications directly deal with confidential financial data. It is mandatory that all the activities performed by banking software run smoothly and without any error. Banking software performs various functions like transferring and depositing fund, balance inquiry, transaction history, and withdrawal and so on. Testing banking application assures that these activities are not only executed well but also remain protected from hackers. This project we have created 3 modules.
Admin, staff, customers. Each of them has different functionality. In that project, we perform testing and found many defects with are further reported to developer & retested by Tester.
