PROJECTS

Knowledge Sharing Point.

A website made particularly for educational institutes that allow the user to view and share research paper and posters on various trends. A student may upload a research paper or posters on the forum which would be further reviewed and rated by the reviewer. Based on the reviews and ratings research paper or poster is ranked. Knowledge sharing point also includes the modules for conveying information about guest lectures and workshop.

SOS alert app.

An Android based mobile application that tracks the current location of a user. Location obtained is sent as an emergency alert to another user. It also includes route finder that helps to map nearest places.

Attorney management.

A web app that provides information on Judiciary system such as various laws, courts addresses etc. Also, provides contact details of other lawyers and attorney firms.

BMI calculator.

An Android based mobile application that provides the user with their body mass index after entering required inputs. Also, provide convertor for height and weight units.
