Project Name

1. Amanora Park Town ERP (Enterprise Resource planning):

Enterprise resource planning (ERP) is business process management software that allows an organization to use a system of integrated applications to manage the business and automate many back office functions related to technology, services and human resources. ERP software integrates all facets of an operation including product planning, development, manufacturing, sales and marketing in a single database, application and user interface.

Responsibilities:

- Understanding Functional Requirement Specifications.
- Involved in identifying Functional, Integration and System Test Scenario.
- Writing Test Cases using Test Case Template.
- Involved in Reviewing Test Cases.
- Executed Manual Test Cases.
- Performed smoke Testing, Functional, Integration, Regression Testing.
- Involved in Test Execution Report for Test Execution.

2. Amanora Park Town CRM (Customer Relation Management):

Customer relationship management (CRM) is a term that refers to practices, strategies and technologies that companies use to manage and analyze customer interactions and data throughout the customer lifecycle, with the goal of improving business relationships with customers, assisting in customer retention and driving sales growth. CRM systems are designed to compile information on customers across different channels or points of contact between the customer and the company which could include the company's website, telephone, live chat, direct mail, marketing materials and social media. CRM systems can also give customer-facing staff detailed information on customers' personal information, purchase history, buying preferences and concerns.

Responsibilities:

- Understanding Functional Requirement Specifications.
- Involved in identifying Functional, Integration and System Test Scenario.
- Writing Test Cases using Test Case Template.
- Involved in Reviewing Test Cases.
- Executed Manual Test Cases.
- Performed smoke Testing, Functional, Integration, Regression Testing.
- Involved in Test Execution Report for Test Execution.

3. Amanora Park Town Helpdesk:

A help desk is a resource intended to provide the customer or end user with information and support related to a company's or institution's products and services. The purpose of a help desk is usually to troubleshoot problems or provide guidance about products such as computers, electronic equipment, food, apparel, or software. Corporations usually provide help desk support to their customers through various channels such as toll-free numbers, websites, instant messaging, or email. There are also in-house help desks designed to provide assistance to employees.

Responsibilities:

- Understanding Functional Requirement Specifications.
- Involved in identifying Functional, Integration and System Test Scenario.
- Writing Test Cases using Test Case Template.
- Involved in Reviewing Test Cases.
- Executed Manual Test Cases.
- Performed smoke Testing, Functional, Integration, Regression Testing.
- Involved in Test Execution Report for Test Execution.

Academic Projects

- **Final Year B.E Project:**

FPGA IMPLEMENTATION OF ORTHOGONAL CODE CONVOLUTION

In communication, data is transmitted, it should remain unchanged till complete reception at the receiver. The data should get recovered even if data gets corrupted due to noise, (Electromagnetic Interference) EMI, crosstalk or the distance after getting transmitted. Error must be detected as well as corrected. This error detection and correction is inherent in orthogonal codes.

Achievements

- Successfully organized an event, “**ROBORACE**” at Central India College of Engg & Technology, Nagpur.
- 1st price in dumb dance Annual Function of , “**MANTHAN**” at Central India College of Engg & Technology, Nagpur.
