- Networking knowledge over OSI and TCP/IP protocol suite.

### **Field of Interest:**

- Software Developer.
- Software Testing.

### **Projects undertaken:**

- 1) Title: “**SMART VEHICLE SERVICE SYSTEM**”(Major project).

**Description:** This project proposes a model to service the vehicle. The service of vehicle usually requires manpower alternative vehicle and time. In the existing system there is wastage of time, money and manpower. So we introduce the system that over comes the drawback of that we have seen in the existing system. So we connect the different component with our application and with the help of application we provide easy pickup and delivery of vehicle from the comfort zone of customer.

- 2) Title: “**REMOTE MOBLI ACCESS**”(mini project).

**Description:** This project proposes a model to secure phones from theft as well as provides options to access an android phone through another android or from basic phone via Short Message Service with secured mobile lock. It also provides facilities to receive the incoming messages, contact number, mobile IMEI number, and etc information through remotely connected device & enables the remote users to control the mobile through SMS. The proposed model is validated by the prototype implementation in Android platform. Various tests are conducted in the implementation and the results are discussed.

- 3) Title: “**AUTOMATIC ELECTRIC BILL GENERATION**”( DBMS project).

**Description:** This project is about to generate automatic electric bill for users. This project helps the users to know their electricity bill and to pay. This project consists of users information like meter number, user name, address and etc, and admin to add, delete or modify the user information. Each user has its own login id with password. In the same manner admin also has its own login id and password. This project is designed on the basis of DBMS and HTML. This project is validated, implemented and results are discussed.
