## ***Professional Summary***

Dedicated Electronics and Telecommunication Engineer from Savitribai Phule University Erstwhile University of Pune, who is interested to branch out and develop skill in the field of Computers and Programming

## ***Education***

- **Savitribai Phule Pune University, Pune (Jun '13 - May '17)**
  - Bachelors of Engineering: Electronics and Telecommunication
- Pursuing German A1 level from Max Mueller India, Mumbai
- Pursuing Msc ( Internet Engineering) from Wroclaw University of Technology.

## ***Technical Proficiency***

- Language: C++, Java, Oracle
- Databases: SQL Server, Oracle
- Software: Matlab7, Python

## ***Co-Curricular Activities***

- Presented project poster at Smt. Kashibai Navle College of Engineering on the title “Smart Card System for Shopping Carts”
- A Final year Project on the title “Traffic Signal Detection”
  - Role: Coordinator
  - Software Platform: Python
  - Abstract: Traffic Signal Detection is a boon for the drivers as it can scan images of the traffic sign and provide information about it to the driver hence assisting him in secure and safe driving. It also helps to create alertness among the drivers. The Python Software Platform is a high-performance language for technical computer, integrates computation, visualization, and programming in an easy-to-use environment. One of the reasons of selecting Python in this research is because it fits perfectly in the necessities of an image processing research due to its inherent characteristics

## ***Extra-Curricular Activities***

- Active member of Prayas – A social service group
- Active member of a Social Community - ‘Electronics and Telecommunication Engineers’

## ***Personal Details***

- Date of Birth: 14 March 1996
  - Marital Status: Single
  - Language Proficiency: English, German and Tamil
-
