Title: **Aarogya Pathology Lab. Management system**

Description:

Aarogya Pathology Lab. Management system is designed to automate the integral data of the Pathology lab. Pathology is the study and diagnosis of disease through examination of organs, tissues, cells and bodily fluids. While we would probably never deal directly with pathology or laboratory as a patient, the dedicated staff in this area has worked with us if we have ever had a blood draw, urine test or any kind of medical test done at Laboratories. This system deals with the same.

Frontend: VB 6 ; Backend:MySql

- **B.E. :**

Title: **Combining Tag and Value Similarity For Data Extraction and Alignment**

Description:

Web databases generate query result pages based on a user's query. CTVS automatically extracts data from query result pages by first identifying and segmenting the query result records (QRRs) in the query result pages and then aligning the segmented QRRs into a table, in which the data values from the same attribute are put into the same column.

Frontend: Dot net ; Backend: Visual Studio

- **SEED :**

Title: **Online Attendance Management System**

Description:

Online Attendance Management system is User friendly. Basic concept was to reduce the manual work of calculating attendance of school students and managing whole record of particular student.

Frontend :PHP backend:MySql
