❖ PROJECT:

Title: HOME DOMOTICS

This project aims at creation of a low cost and flexible home control and environmental monitoring system. We used microcontroller technology in this project. In addition, a mobile phone is interfaced with microcontroller through a Bluetooth device in order to control the system. It includes automatic load controlling, fire detection, temperature sensing, and motion detection, etc. Furthermore, it has advanced security compared to other houses and can send a message to the user for action that occur inside his/her house while he/she is away from home.

Title: VIDEO Steganography

This project aims at providing end-to-end security to the end users. We have designed a video steganography system to provide document encryption and decryption at the Sender as well as Receiver side using AES algorithm and DWT technique using MATLAB 15 software.
