ACADEMIC PROJECTS

Title : Plus BKSP Toll Management

It is a toll management system design to solve problems occur between the tolls. There is an operational User which will raise complaint and has authority to authorize or unauthorized a complaint. There are different department like HR, IT, SAFETY, MAINTAINANCE, etc. against which complaints can be raised. There is a solution provider who will provide solution for complaints raised by operational user.

Software testing performed

- Test cases are written
- Execution of test cases is performed
- Defect report is created

Title : Ambulatory System For Soldiers Using Zigbee

This project is an assistive device which is used for tracking and monitoring soldiers. It describes the design and implementation of a system for tracking and monitoring soldiers. The system consists of mobile units carried by soldiers and a fixed wireless sensor network. Based on some preset parameters, the WSN communicates periodically location information of soldier to a central server. The communication between mobile units and the WSN relies on the Zigbee protocol. The design provides an option (such as an alarm button on the mobile unit) for soldiers to request help in case of emergency. The location information is mapped onto a system through GPS for ease of localization and efficiency in providing help.

TECHNICAL SKILLS

- Java, SQL, Manual testing, Selenium IDE, Selenium WebDriver, jmeter.

CERTIFICATIONS

- Certificate in Desktop Publishing
- Certificate in MS-CIT

WORK EXPERIENCE

- Fresher

PERSONAL INFORMATION

Father's Name : Mr. Dilip Borde
