Internship Experience Duration: - 6 Months (Year – 2016)

Internship with “Sushma Technology Pvt. Ltd.” As Trainee Software Developer on Project “Material Management System”.

Project Detailing

Material Management System keeps record of materials movement, purchase order, supplier, labor information, projects information and assets. This system helps to maintain consistent flow of material, purchase order, expediting, photos of the project and assets which improves cash flow and decision. This system helps to record and track material on basis of quantity and value which significantly improve optimize flow of goods, resources and visibility. The goal of materials management is to provide an unbroken chain of components for production to manufacture goods on time for the customer base. The materials department is charged with releasing materials to a supply base, ensuring that the materials are delivered on time to the company using the correct carrier. Materials is generally measured by accomplishing on time delivery to the customer, on time delivery from the supply base, attaining a freight budget, inventory shrink management, and inventory accuracy.
