Objective:

Quest to work in a professional environment, which will help me impart knowledge about latest technologies by virtue of my sincerity and dedication. I intend to work towards the growth and prosperity of the company.

Summary:

- I have **2 years 8 months** of work experience as **Senior Quality Engineer**. I was working at Zeus Learning from May 2014 to January 2017.
- I have studied Engineering in Information Technology.

Technology Skills:

| Area | Details |
|---------------------------|--|
| <i>Software Testing</i> | Manual Testing, UAT, Regression Testing, DB Testing |
| | Automation Testing - Basic knowledge of Selenium, Sikuli |
| <i>Bug Tracking Tools</i> | Bugzilla, Redmine, Axosoft, Rally |
| <i>Other Software</i> | Smart SVN, MS Office, Open Office |

Other Interests:

- Like to play various outdoor sports and enjoy travelling to new places.

Work Experience:

Employer: Zeus Learning Pvt. Ltd (May 2014 – January 2017)

The projects and websites have responsive UI which is compatible with:

- *Different OS and their versions across various browsers.*
- *Multiple tap devices.*

Projects worked on:

I) mySylvan Authoring Tool

Client: Sylvan

Environment: Asp.Net, JavaScript

Testing Methodologies: Manual Testing

Tools Used: Bugzilla

Project Description

mySylvan Authoring Tool is a client/server based application developed, where client can author e-learning based activities for kids in USA.

II) Learning Express

Client: LE

Environment: Asp.Net, JavaScript, AngularJS

Testing Methodologies: Manual/Automation Testing

Tools Used: Bugzilla, Redmine, Rally

Project Description

Learning express works on Agile methodology. They have several sub projects which have day to day integration like:

- 1. Report Portal*
- 2. Course Admin*
- 3. Smart Registration for Portals and Learning Express Library*
- 4. Corporate Website*
- 5. Job & Career Accelerator Website*
- 6. Resume Hub*
- 7. LEL centres*
- 8. Data Migration of users from JCA4.0 to JCA5.0*

Job duties:

- *Reviewing of software requirements. Define standard tests to measure the requirements. Once each requirement is passed through the tests then evaluate and freeze the functional requirements.*
- *Preparing test plan that includes overall test methodology that includes following:*
 - A. *Brief introduction for the test scope and test data.*
 - B. *Deciding test environment based on the requirements.*
 - C. *Creating test scenarios and test case documents.*
 - D. *Preparing workflow about features to be tested and features not to be tested.*
- *Preparation of test scenario and test case documents that includes a hypothetical test story used to help a person think through a complex problem or system and creating documents comparing the expected and the actual results for each module.*
- *Execution of test cases and creates the pass/fail results as per the test case document.*
- *Maintaining defect log by locking them in the bug tracking tool explaining the severity and the priority for each defect, so the developers get estimation about the bug fixing.*
- *Regression and retesting the modules or the application after bug fixing.*
- *Basic database testing to verify the correct results and records in the database.*
- *Compatibility testing for the application on the basis of browsers and/or devices.*
- *Conducting review meetings within the team.*
- *Communicate at all levels as well as with the client, take initiatives and work with a great sense of responsibility.*
- *Resource allocation as per the client requirements.*
