### PROJECT WORK

**BE Project** - “An Android based application City guide -SHIRDI.”

**Languages** - Front End:- Java, XML, Back End :- My SQL.

**Aim** - City guide android application includes proper guidance to the tourist about the locality, timings, transport services, and further more services.

**Description** - The system is a combination of smart phone and Internet services and will facilitate tour and life for user. We have investigated realization of city guide over Android. The goal of the project is to explore how to realize a mobile city guide using the Android platform, including a prototype of the city guide. The investigation covers basic functions of city guide such as showing map, showing POIs on map, showing direction, showing user's location on map, showing the details of hotels, emergency services are being listed along with phone numbers, time table of the public transport is available. We try to integrate current innovational technologies as many as possible.
