## Project Details

---

**B.E. Project:** Security on cloud storage using self-destruction and data shuffling.

We propose a system to enhance the security, the data uploaded by user is Shuffled between the numbers of folders within cloud storage after particular interval of time to avoid the tracking of the data. Avoid de-duplication of file.  
Java, JavaScript, html, MySQL were used for implementation.

**T.E. Mini Project:** To make Unique Identification (UID) System.

To create a “Unique Identification (UID) System” using wamp server .This project follows an idea of online registration providing facilities like storing customer details to our website. We use three tier application/JDBC connectivity to create bridge between java and database.HTML, JAVA and MYSQL etc. were used for implementation

## Technical Skills
