PROJECT REPORT

- **Project on E-Learning on Data Structure**.
  This project consists of teaching videos of Data structure for easy learning. It is done by using macromedia flash player tool .The main of this project is to make the core part of programming becomes simple to understand.

- **Engineering project on Website Security using Visual Cryptography**
  In this project we proposed a new approach named as "Phishing detection based on Cryptography" to solve the problem of phishing. The use of image is explored to preserve the image captcha by dividing the original image into two shares that are stored in separate database servers such that the original images do not reveal the identity of the original captcha .Once the original captcha is revealed to the user it can be used as the password. Several solutions have been proposed to tackle phishing.
