PROJECTS

TITLE: Identify the vehicles that run without paying toll.

Group Size: 4

Technologies : Java

Role : Tester

Process :

When any kind of vehicle came at toll plaza software extracts the vehicle number using webcam and stored in database and also print the toll receipt. If some vehicle are runs without

paying toll, then this vehicle marked as non-toll paid vehicle. If vehicle comes again at toll plaza the software identify this vehicle and some authority will take action against the this vehicle.

TITLE: PLUS BKSP-TOLL MANAGEMENT.

Technologies : ASP.NET

Role : Tester

Process :

PLUS BKSP project is used for managing toll complaints. There are four users-Administrator, Operational user, Solution Provider, Head quarter. Operational user raise the complaint to solution provider. Solution Provider have the solution then this complaint will be closed. And again it send to the operational user.Operational user authorized or unauthorise the complaint. Unauthorized complaints again send to solution provider. If solution provider have not solution then it put on hold. Head Quarter is managing the toll complaints, In that module we search the complaint by date. date range. department. And report is exported in csv format and in chart.
