PROJECTS UNDERTAKEN

- **Final Year Project: Online Staff Leave Management System**

    We have implemented "**Online Staff Leave Management System**" is a web based application developed in the Windows platform for the staff/faculty of the college and It provides the facility for the staff to take a leave and manage them with proper login.

    This module is a single leave management system that is critical for office policy tasks and keeps the record of vital information regarding working hours and leaves

    In this module the HOD and the Principal will have permissions to look after the data of every member of their department

    HOD as well as Principal can approve the leave and have a view of the leave information for every faculty

    This application can be used in college premises to reduce work load, this projects main idea is to develop online centralized application connected to database which will maintain faculty leaves, notice information and replacement(if needed).
