PROJECT DETAILS

Project Name : **Siemens FOS IT MANAGEMENT Mobile Application.**
Team Size : **5**
Duration : **6 months (26 Dec 2016 - 7 May 2017)**

Description: Siemens FOS IT is a ticket management tools that bind the CA service desk manager and the application running on your mobile the existing interface of CA service back end application communication will be done through SOAP services. Authentication call is made to CA web-services. CA will generate a session id and sends it back in response. We also used the GCM connections.

Web service is develop for Java then JSON parsing in Android, for utilization used Volley Library all these things are done by insomnia tool. My work in this Application Dashboard, Login Page, System Availability and Message hub for database we used Postgres SQL.

Advantages:
- Real time consumption of the data from messaging system.
- No single point of failure.
- Scalable to large number of users.
- Support for wide range client devices such as desktop, laptop, tablets and mobile devices.
