SUMMARY:

- ➢ **1 year** of professional experience in Software Engineering in Banking domain.
- ➢ Expertise in specialized knowledge of object oriented, web based applications design and development using .Net technologies.
- ➢ Expertise in all phases of software development life cycle i.e. System Analysis, Design, Development, Testing, Deployment, Support and Documentation.
- ➢ Functional Expertise in Banking Domain.

PROFESSIONAL EXPERIENCE:

❖ *Software Engineer – Ember Technologies Pvt. Ltd.*

(April 2016 – March 2017)

PROJECTS:

- **CCRS(Customer Complaint Resolution System)**
  Client: Axis Bank
  Technologies: C# .Net, SQL 2012

  The main objective of the application is to handle and centralize all the complaints that the Bank customers notify to the help desk. These complaints are categorized into ATM, POS, Internet banking, and EDC terminals. Once the complaint is lodged into the system, the respective teams related to the terminals are notified with E-mails and necessary actions and amendments are taken on the complaint and thus faster resolution is provided.

RESPONSIBILITIES:

- Coding for different modules of the project.
- Creating the table structure and procedures to maintain data.
- Unit and Integration testing.
- UAT Support and bug fixing.
- UI designing.
- Functional Specification Document, Design Document, Technical Document, Test Cases, Testing Document and Code Review Document.

- **Counter-party limit monitoring system**
  Client: Axis Bank
  Technologies: Vb .Net, Oracle 11g

  Monitoring/managing/analyzing the transactions which are made by dealing in the financial instruments between bank and its customers [counter-parties] is the main motive of the application. The application maintains different type of limits such as counter-party limit, settlement risk limit and exposures. The system is designed to monitor utilization of those limits, In case the utilization crosses the defined limit, then the limit gets breached.

RESPONSIBILITIES:

- Coding for different modules of the project.
- Creating the table structure and procedures to maintain data.
- Unit and Integration testing.
- UAT Support and bug fixing.
- Functional Specification Document, Design Document, Technical Document, Test Cases, Testing Document and Code Review Document.
