Academic Projects

1.

Title: My Box

Platform: J2EE
Duration: 1 Month

Role   : UI Development

Description:

Our project My Box is based on cloud storage web application with responsive UI, in which we are enhancing the current data storage scheme using chunk mechanism to manage data storage at a centralized location. Our project will allow users to store their files of any type such as images, PDFs of any extension like (. JPG, Ping, Doc, .PDF, etc.) on the server. Every user will get certain storage space to upload their data to the cloud.

2.

Title: Advanced CCTV Security
Platform: Hardware Platforms (ARM, AVR, DSP etc.)
Duration: 3 Months

Description:

In this project we are aiming to achieve man less security in any given premises using CCTV.We are using master slave system in which any of the camera is destroyed then the remaining CCTV camera will become master. When a camera is destroyed it will be sensed by lens breakage sensors and necessary actions like acid spilling, gas spray are actuated using micro controller and other camera takes the action.
