H.S.C	2013	State Board of Maharashtra	**57.83%**
S.S.C.	2011	State Board of Maharashtra	**82.73%**

Project:

- **Android artificial dietitian–** The online artificial dietitian is an application with artificial intelligence about human diets. It acts as a diet consultant similar to a real dietitian. This system acts in a similar way as that of a dietitian. A person in order to know its diet plan needs to give some information to the dietitian such as its body type, weight, height and its working hour details. Similar way this system also provides the diet plan according to the information entered by the user. The system asks all this data from the user and processes it to provide the diet plan to the user. The main part of the project is speech recognition, thus feels like talking to physical dietitian and therefore the user does not need to visit any dietitian which also saves time and the user can get the required diet plan in just a click.

Languages Known:
- English
- Hindi
- Marathi
- Telugu

Technical Proficiency:
- Languages Known: Basics Of Python, Java, HTML and CSS , MySQL.
- Basic Software:Microsoft Word, Microsoft PowerPoint, Microsoft Excel, LaTex(ubuntu)
