Projects

➢ BE Project: **Progressive Infrastructure Development Using S-E-A Algorithm**
It was related to the development of Land by using Algorithms which helped to determine the area and was helpful to be used by the government. The motive behind the project was to identify the fraud and illegal constructions done by the builders and provide the detailed data to the government.

➢ Mini Project 1: **Web Technology**
I made a site named **"YouthGuide"** using HTML, CSS and Java Script, displaying the feedback of general things related to student life in Mumbai such as various hangout places reviews, books reviews, colleges reviews entertainment reviews, etc.

➢ Mini Project 2: **Network Programming Laboratory (NPL)**
Install and configure samba server on Linux system to share the files with the Windows system. Thus, making file transfer between Linux and Windows possible.

➢ Mini Project 3: **Network Threats and Attacks Laboratory (NTAL)**
The aim of the project was to detect threats in the system such as trojan horse, worms and other viruses.
