PROJECT DETAILS

Project 1
Title: Bike Trading System .

Duration: 1 Month

Technology: J2EE, MySQL

Project Role and Responsibilities:
1. **Creating Database**
2. **Documentation of project**

Project Description:
Our project will computerize the current bike booking system and thereby making it more efficient, secure and reliable for customer. This website will allow customer to see details of selected bike without being registered to the system. Our website also provides the feature of comparison between two bikes. If any customer wants to book a bike, then customer has to register to the website by providing details and then the user can book a bike, after booking, it generates an id with delivery date.

Project 2
Title: Effects Of Different Types Of Coating On Digital Prints

Duration: 12 Months

Project Description:
The Different types of coating effects the substrate differently and in that way they change the appearance of color. In this paper we measured the effects of different types of coating on digital prints , with both Matt and Gloss foils. Result of this project to explore several influencing parameters between non-coated and coated prints, as well as the differences between coated prints with Matt and gloss foils.

CERTIFICATIONS AND CO-CURRICULAR ACTIVITIES

- Participated in gaming event at school level competition.
- Volunteer at "VERSATALIA " Event in college.
