Academic Project

PG-DAC Project

Title: Online PG Service

Platform: J2EE (Spring-Hibernate)

Duration: 1 Month

Description: The web based application, provides a common platform for the students and PG owners. This application minimizes the students' efforts that are in search of accommodation nearby their institute by providing the refined collection of Information of the available PGs. It also provides facilities to students such as status of the rooms, owner's info, rating, distance of PG from institute. Owners can upload the available room details.

B.E. Project

Title: EaaS-Energy as a Service

 Platform: Java Programming

Duration: 6 Months

Description: The aim of this project is to investigate if the cloud can be used to execute mobile phone application functions faster by offloading the task to the cloud, in comparison to execute the function on the mobile phone. Cloud computing is also be investigated as well as if different phones models with different network connection are more or less suitable for offloading.
