Tejora Technologies (Aug 2014 to Apr 2016)

Axis Securities:

My profile was of a lead developer and my role is to handle team of developers, UI and QA related to CMS. Current project in hand is recreating websites for Axis securities using YII and Joomla. CMS part of the website is being developed using Joomla.

SME Pratham:
Projects completed are – Development of the software "SME Pratham" for axisbank to manage entire loan process using YII framework. Software have different users in different roles like - Credit Manager, Account Manager, Regional Manager, Geography head, SME head, Super admin, CO SME head etc. Software included features like loan related documents upload, to complete the stage from "In Principal" to "Disbursement", Case Assignment, To raise and respond queries, Save History and Reports which display the average TAT for all stages one by one. Avg query time, Avg time to close the query, avg time to respond for the document.

Qtech Software Pvt. Ltd. (July 2013 to Jan 2014)

OTRAMS (Online Travel and Reservation Management System) adds and customizes XML feeds from Global Hotel Resellers and gives clients the choice of the best available hotel rates. Web design services team gives each and every client a site that is unique to their business. Software provides B2B and B2C services. Software has been created based on different suppliers like GTA, Destination of World (DOTW), Hotel beds, Miki, travco, tourico, Rezlive etc. Using these services, user can get best options for available hotels and rooms.

- Omega Bookings: (http://www.omegabookings.com/)
  - Agent can register and log into the system. After admin approval agent can book the hotel rooms for the users. User can search the hotels by hotel name, price range and rating of hotels. Agent can send an estimate for the specific hotel to users on their email address. On the admin side, he can add markup for each supplier added for the site. He can view/add/block agents, view the performance of agents in the chart, can view / search each booking, mark bookings as active/Inactive. Admin can see reports for each bookings/agents/suppliers.

Viteb Solutions Pvt. Ltd. (Nov 2012 to Apr 2013)

Within this duration, I was supposed to manage the development part as well as project management and client communication. As a lead developer in the team, I had worked in prestashop and drupal (version 5, 6 and 7) frameworks and generated a site specific data migration scripts to migrate all the data of users and articles from drupal 5 to drupal 7.

- A shopping cart application having use of **prestashop** module. There were few modules which were created custom as per requirement. I.e. Feature categories display at home page, a pop up to send the details of favorite product to a friend, etc.
- A site specific custom module was created for a site in drupal 6 to send newsletters to subscribers. Module was containing a form having all Ajax features including Add section, Remove section, Save Section, sorting items, Reload items on change of drop down list, drag-drop items, Reset list. All these features were built with libraries (ahah) which were supported in drupal 6.

- Scripts which were created in drupal 6 and 7 i.e. to migrate the users, articles (having custom fields), to assign the specific roles to all the existing users and subscribe them from drupal 5 to drupal 7.

Biztech Consultancy (Jan 2008 to Nov 2012)

Within this duration, I have worked in vb, crystal reports, corephp and cakephp, given training to the people joining as a junior developer / trainee. I promoted as a team leader and given responsibility to manage the development team, analysis of the project as well with client communication, to manage relevant people of different team (designing, QA) for the projects.
- Blended Beauty (http://www.blendedbeauty.com)
  - Blended Beauty is a producer of various hair care products especially for those who have kinky, curly or wavy hair. They aim to deliver products formulated with naturally derived ingredients that beautify the look of hair and nourish it.
- Ad capacity (www.adcapacity.com)
  - Ad Capacity is an online advertising company that gives you unbiased advice on how to attract and target customers. We developed the website of this company deploying CakePHP framework and integrated Facebook social media channel to stay connected with their customers.
- Upsac (www.upsac.org)
  - In this wordpress site, we had created a new module for piers. All the piers were managed from admin panel. User can enter his review and rate about the piers. All the reviews and rating can be managed from admin side.
- Streamer (http://tzalam.streamer.co.il/)
  - It is a corephp multilingual site. We made few customizations in the site. Facebook integration was done in the site so user can connect to site with his facebook details. We have built a search feature in the site.
- Strommen
  - Strommen plug-in fetches XML-feeds from Speaker.no (commercially available) and displays fixture list, results and league table for the Norwegian Football League. The best part is that the plug-in supports multiple languages. This project required displaying Norwegian football scores seamlessly in an online blogging application. It required developing a WordPress plug in that can fetch XML feeds.
- Snaplogic
  - It is a tool which can connect two tables of same or different database. We had one project in which we need to combine the database of local desktop application and a magento application.
- BRMS (Biztech Retail Management System)
  - I have worked in the desktop applications with vb. I have knowledge of crystal reports as well.
