Projects:

- **Squad InfoTech Project Title: PLUS BKSP Toll Management**
  Role: Software Tester
  Responsibilities: Prepare Test Scenario , Prepare Test Cases, Test Plan and Execution.

Brief Description:

Plus BKSP is a toll complaint management web application project based on infrastructure domain for the company Plus, It has four main modules Administrator, Headquarters User, Operational User and Solutions Provider. The Administrator creates login ID for other users and unblocks the users if they are blocked, The HQ user Audits the complaints, The Operational User Raises the Complaint for various departments and The solution provider provides solution for the complaint in his department.

- **Academic Project.: Water Tanker Monitoring and Controlling System**

  Brief Description:

  This project is based on water tanker monitoring and controlling system in which the numbers of tankers provided to the particular village are checked by detecting the signals from tankers to the well over some specific distance. It also checks the water level in well by using sensors. Each village is having a server which is able to keep records of all the water tankers with date and time and water level in well. These records are accessed by an administrator in the home ministry which is connected to each other through network.
