Project Undertaken

MindScripts Technology Training Solutions
Duration: 2 months
In-Flow Inventory Management system
 Project Description-

Inflow Inventory Management System Is primarily used for specifying and identifying stocked goods, replenishing deleted stocks and tracking movement of stocked goods. The scope of Inflow Inventory Management system involves replenishment lead time, carrying costs of inventory, Inventory valuation, inventory visibility, physical inventory, replenishment and demand forecasting.

 Roles and Responsibilities:
- ✓ Understanding the requirement specification for the product and deriving Test Cases
- ✓ Deriving and preparing test data
- ✓ Executing Test Cases and create Defect Logs
- ✓ Involved in Manual Testing of applications
- ✓ Defect Reporting & Tracking

Academic Project: MCA
- ➢ **Industrial Training Project (MCA) –"Employee Performance Portal in JAVA"**

It was a live project I have worked with Perpetual InfoTech Pvt. Ltd. For 5 months duration. The System was designed to all the employees to provide details like tasks performed and performance measures improved etc. to their superiors. It allows superiors to evaluate and analyze the employee's performance and work done by him and target achieved in a given period of time and to rate him. The project was web based software that will help to provide an interface to management and other users to manage the details of and to generate required reports.
